Subject: Montgomery Building

Ben/Scott,

Thanks for meeting with Holly and I on Thursday. As of right now we are interested in looking into the feasibility of the Montgomery Building for our potential use. That being said, I am going to try to arrange another visit to the property with a contractor in tow to see if we can't ascertain how "flexible" the building is in its current layout and for our potential use. Thursdays after lunch are always good for me given I am at the First Baptist Church for Rotary. Also, you mentioned that the County had done a "feasibility study" on the renovation of the building. Is there any way I can get my hands on that? I think it would contain some very useful information for us going forward, especially in the realm of potential asbestos abatement. Thanks for your help and feel free to call at 984-9125.
